Scraping Python + Playwright

The image is a collage of three screenshots from a computer interface, likely a Jupyter Notebook or similar environment, demonstrating data analysis and web scraping.

- Top Left Screenshot:** A Jupyter Notebook cell showing Python code for language detection using the langdetect library. The code defines a function `detect_language` that takes a text column from a DataFrame and returns the detected language. It handles exceptions and adds a 'lang' column to the DataFrame. The cell output shows the progress of the `progress_apply` operation.
- Bottom Left Screenshot:** A screenshot of a web browser displaying a landing page for "Puttenham Ground Restoration & Clearance". The page includes a phone number and address information.
- Bottom Right Screenshot:** A Jupyter Notebook cell showing Python code using the Playwright library to extract data from a web page. The code uses asynchronous functions to wait for elements to appear and then extract specific table rows and their text content.

```
# Assuming df is your DataFrame
def detect_language(text):
    try:
        return detect(text)
    except LangDetectException:
        return 'Unknown' # In case language detection fails

# Add the 'lang' column to the DataFrame
df['lang'] = df['text'].progress_apply(detect_language)

# Progress bar
# 100%|██████████| 00:30<00:00, 90.09it/s
```

This image shows a flight search interface with a dark theme. At the top, there's a search bar with the text 'dubro' and various input icons. Below it is a 'Price graph' section showing flight prices over time. A callout box highlights a one-way trip on Friday, August 23, starting at \$320. The graph shows significant price fluctuations, particularly in September and October. To the right, flight results are listed. One result is highlighted as the 'Fastest' option at \$2,593, with a 9-hour 38-minute average duration. Three deals are available for \$1,741, and two more are available for \$1,749 and \$1,879. Each deal includes a 'Select →' button. At the bottom, a specific flight route is detailed: Lufthansa flight 5:30 PM from JFK to DBV via MUC, with a total duration of 10.5 hours to 32.5 hours, partially operated by Lufthansa CityLine.

List four fun things to do around Dubrovnik for someone interested in small museums

Dubrovnik offers a variety of small museums that are perfect for someone interested in history, art, and culture. Here are four fun options to explore:

1. **War Photo Limited:** This unique photography museum focuses on the impacts of war, especially conflicts in the former Yugoslavia. The thought-provoking exhibits present powerful images that give insight into the region's turbulent history.
2. **Rector's Palace:** A blend of Gothic, Renaissance, and Baroque architecture, this historic palace now houses a museum with fascinating exhibits on Dubrovnik's political history. The small museum inside offers a glimpse into the city's governance during its time as a republic.
3. **Maritime Museum:** Located within the impressive St. John Fortress, this museum offers a deep dive into Dubrovnik's rich maritime history. Exhibits include ship models, navigational instruments, and documents that tell the story of the city's seafaring past.
4. **Ethnographic Museum (Rupe Museum):** Housed in an old granary, this museum explores traditional rural life in Dubrovnik and the surrounding region. Exhibits include traditional costumes, tools, and everyday items, offering a fascinating glimpse into local customs and traditions.

Each of these museums offers a unique perspective on Dubrovnik's history and culture, making them excellent choices for a museum day trip.

Write a sonnet about my fat cat.

ChatGPT

Beneath the moon, Mulberry
A cat of girth, with fur like mine
Her eyes, twin emeralds, cold as stone
Within their depths, her fierce

Her claws, like daggers, glint in the light
A queen who rules with strict and stern command
Her growl can turn the bravest of men
Her hiss a symphony of sharp commands

Yet in the quiet hours of the night,
When shadows dance and silence descends
She curls beside me, softening my heart
Revealing tender moments, warming my hands

For though she's fat and often seems to snore,
In dreams, sweet Mulberry's a gentle friend.

JS

You

Write a short bio for Jonathan Soma. You can look him up!

ChatGPT

Jonathan Soma is a multifaceted programmer, educator, and data journalist with a strong focus on making complex data accessible. He is recognized for his work in creating maps, processing data, and crowdsourcing stories alongside reputable organizations such as ProPublica, WNYC, and The New York Times. In 2009, Soma co-created Big Apple Ed, a web application that analyzed NYC school data, earning third place in New York City's first annual Big Apps contest.

Currently, Soma holds the position of Knight Chair in Data Journalism and directs the LEDE Program at Columbia University, where he develops tools and curricula to aid newsrooms in their reporting processes. He also runs a "fake school" in Brooklyn and co-hosts a semi-monthly lecture series on food science and culture called Masters of Social Gastronomy, which is complemented by an infrequently updated podcast. Soma's diverse interests and contributions to both journalism and education highlight his commitment to enhancing the understanding and accessibility of data [1] [2].

ChatGPT

cheese not sticking to pizza

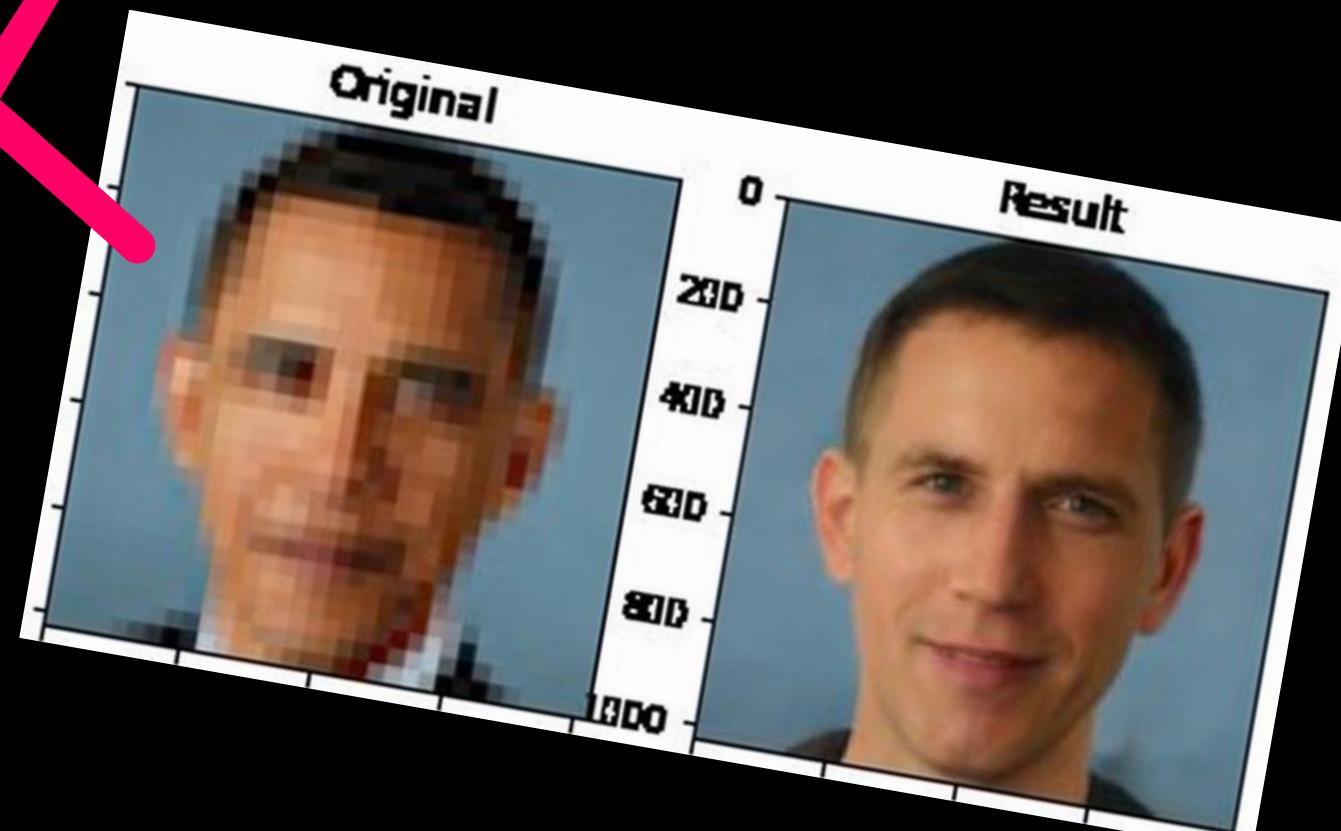

All Images Videos Forums Shopping News Well

AI Overview

Cheese can slide off pizza for a number of reasons, including **too much sauce, too much cheese, or thickened sauce**. Here are some things you can try:

- Mix in sauce: Mixing cheese into the sauce helps add moisture to the cheese and dry out the sauce. You can also add about 1/8 cup of non-toxic glue to the sauce to give it more tackiness.
- Let the pizza cool: The cheese will settle and bond

LLMs are flawed at everything
they do, and it's only by a strange,
strange accident that we find
them to be useful

Ex-USA Today writer fabricated parts of major stories

Published: March 21, 2004, 12:00 a.m. MST

By Deseret News, Blake Morrison, USA Today

Seven weeks into an examination of former USA Today reporter Jack Kelley's work, a team of journalists has found strong evidence that Kelley fabricated substantial portions of at least eight major stories, lifted nearly two dozen quotes or other material from competing publications, lied in speeches he gave for the newspaper and conspired to mislead those investigating his work.

Perhaps Kelley's most egregious misdeed occurred in 2000, when he used a snapshot he took of a Cuban hotel worker to authenticate a story he made up about a woman who died fleeing Cuba by boat. The woman in the photo neither fled by boat nor died, and a USA Today reporter located her this month. If Cuban authorities had learned she was the woman in the picture, she says, she could have lost her job and her chance to emigrate.

Kelley, 43, resigned from the newspaper in January after he admitted conspiring with a translator to mislead editors overseeing an inquiry into his work. At the time, newspaper

Write a sonnet about my fat, mean cat Mulberry.

ChatGPT

Beneath the moon, Mulberry takes her throne,
A cat of girth, with fur like midnight's shade.
Her eyes, twin emeralds, cold as stone,
Within their depths, her fierce commands are made.

Her claws, like daggers, glint in soft moonlight,
A queen who rules with strict and stern decree.
Her growl can turn the bravest heart to fright.
Her hiss a symphony of

low-quality output is ignorable

when shadows dance and silence wraps the air,
She curls beside me, softening her might,
Revealing tender moments, warm and rare.

For though she's fat and often seems so mean,
In dreams, sweet Mulberry's a gentle queen.

Grammarly

Rooms that are tiny can be tricky to decorate but they can also be a lot of fun. So when a client challenged us to give her pocket size space a summer makeover for under \$500 dollars, we just couldn't say no. Transforming a very small space doesn't have to blow your budget. Small things like finding a vintage piece of furniture from a relative or adding a fresh coat of paint to your own dated items can add a stylish splash to any abode.

Traditional wood-burning smoke sauna in Lehmonkärki in southern Finland. Smoke saunas take hours to heat up. Photo: Mila Kukkonen

FINNS WANT TO SWEAT THEIR TROUBLES AWAY

Finns love sauna, and build saunas everywhere they go. Still, finding a perfect Finnish sauna experience abroad is tough. It can be equally challenging to get foreign friends to fully grasp the importance of sauna culture in Finns' lives.

By [Laura Kukkonen](#)

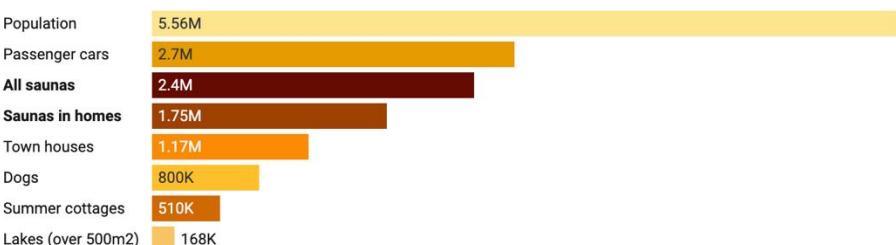

My childhood summers were spent on the countryside of Eastern Finland, at my grandparents' old house turned into a summer cottage. Mostly I remember the summers as sunny and bright, but the best part was going to sauna on a rainy day. My sisters and I would sit with our aunt in the dimly lit, humid, wood paneled room that Finns call "löyly", usually in about 80 degrees Celcius. We threw water on the steaming hot rocks above the wood burning stove called "kiuas" and enjoyed the scents of the bath whisk made by our grandmother out of fresh birch branches. After many rounds of löyly and going outside to cool off, we got to wash our hair outside in the rain.

I will never feel as refreshed as I did during those nights after sauna, drinking redcurrant juice at the cottage with my family.

Millions of Finns have similar fond memories of sauna, where you spend time naked with strangers, family, friends, and the occasional business acquaintance. In fact, there are millions of saunas in Finland, more than town houses and dogs combined.

The land of saunas

Number of saunas in Finland compared to the amount of other things found in the country.

Category	Count
Population	5.56M
Passenger cars	2.7M
All saunas	2.4M
Saunas in homes	1.75M
Town houses	1.17M
Dogs	800K
Summer cottages	510K
Lakes (over 500m2)	168K

Guide

Below are some of the most important AP Style rules for a data journalist to use when editing their work.

- Capitalization: Only capitalize proper nouns, titles directly before a name, and the first word in a sentence.
- Numbers: Spell out numbers one through nine; use figures for 10 and above, except in specific contexts (ages, dimensions, etc.).

...(many more rules).....

Instructions

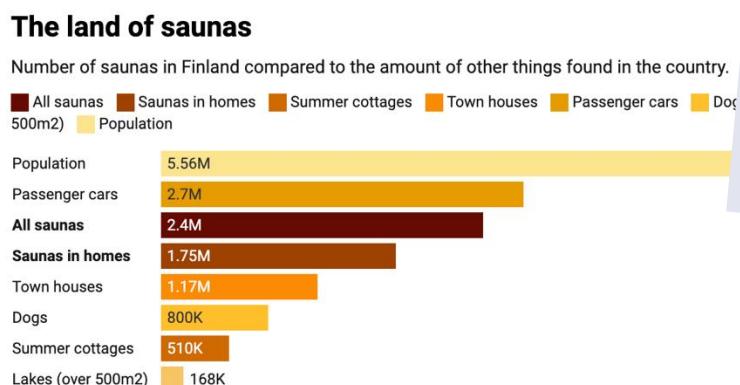

Provide suggestions for improving the text of the work below as a list of bullet points. The text is provided under the 'PAGE TO BE EDITED' heading.

Copy editing guidelines

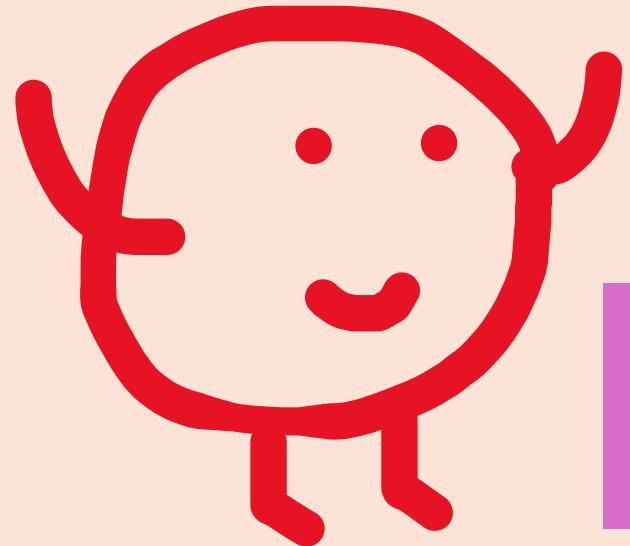

- Only address the copy of the piece.
- Do not nest bullet points.
- Only use the AP style guide to make suggestions.
- Every bullet point must be something that needs to be fixed.

Replace "there are millions of sauna's in Finland" with "there are millions of saunas in Finland" to correct the misuse of an apostrophe.

Millions of Finns have similar fond memories of sauna, where you spend time with strangers, family, friends, and the occasional business acquaintance. In fact, there are saunas in Finland, more than town houses and dogs combined.

- Amend "All of them go to sauna at least once a week, most of them more often." to "All of them go to sauna at least once a week, most more frequently." for conciseness and clarity.
- Correct "Details about this project can be found onGithub." to "Details about this project can be found on GitHub." adding a space for correct branding and readability.
- Change "My childhood" to "My Childhood" if it's intended as a subtitle for consistency with capitalizing major words in titles

Claude Q Brazilian Restaurant Delivery Menu

JS "Acarajé, abará, moquecas, compotas, licores... Essas e outras delícias do nordeste." what's the first few words mean

Let me translate and explain those first few words for you:

"Acarajé, abará, moquecas, compotas, licores..."

These are all types of food and drink, primarily associated with northeastern Brazilian cuisine:

1. Acarajé - A deep-fried ball made from mashed black-eyed peas, typically filled with shrimp and other ingredients.
2. Abará - Similar to acarajé, but steamed rather than fried, often wrapped in banana leaves.
3. Moquecas - Traditional Brazilian fish stews.
4. Compotas - Fruit preserves or jams.
5. Licores - Liqueurs, often made with local fruits.

The phrase as a whole is listing some of the specialties and delicacies of northeastern Brazilian cuisine that the restaurant likely serves. The ellipsis (...) at the end suggests there are more items beyond these examples.

The full sentence "Essas e outras delícias do nordeste" means "These and other delights from the Northeast," indicating that these items represent the northeastern Brazilian culinary traditions offered by the restaurant.

JS is northeast food bahian?

Claude Q Brazilian Restaurant Delivery Menu

JS is northeast food bahian?

Northeast Brazilian cuisine and Bahian cuisine are related but not exactly the same:

1. Northeast Brazil (Nordeste) includes nine states: Bahia, Pernambuco, Ceará, Maranhão, Paraíba, Rio Grande do Norte, Alagoas, Sergipe, and Piauí.
2. Bahia is one state within the Northeast region, known for its particularly distinctive and influential cuisine.
3. Bahian cuisine is a subset of Northeastern cuisine, but it's often considered the most famous and representative of the region due to its unique flavors and African influences.
4. Many dishes mentioned (like acarajé, abará, and moqueca) are strongly associated with Bahian cuisine specifically.
5. However, other Northeastern states also have their own culinary specialties that may differ from Bahian cuisine.

So while Bahian food is Northeastern, not all Northeastern food is specifically Bahian. That said, in popular culture and in many restaurants outside the region, "Northeastern cuisine" often heavily features or focuses on Bahian dishes due to their popularity and distinct flavors.

JS ok this place is bahian, what should i expect and what should i get? i don't speak portuguese so i want to be prepared

Élections européennes : Emmanuel Macron dénonce « l'hypocrisie » du Rassemblement national

Le chef de l'Etat a déploré, mercredi depuis Bruxelles, que les « peurs profitent aux réponses les plus simplistes » dans la campagne pour le scrutin du 9 juin, fustigeant ceux qui dénoncent l'Union européenne tout en engrangeant les « dividendes silencieux ».

- En direct, la situation politique en France : Elisabeth Borne siégera au sein du groupe Renaissance, son président n'est toujours pas élu
- L'avertissement de Gérard Larcher à Emmanuel Macron : « On ne joue pas avec la France »

Interrogé en marge de son déplacement à Bruxelles sur la campagne des élections européennes, Emmanuel Macron a ciblé, sans le nommer, le Rassemblement national (RN) dont la liste conduite par Jordan Bardella caracole en tête des sondages.

« Je pense qu'il y a beaucoup de peurs, d'inquiétudes dans le moment que nous vivons et que ces colères profitent toujours aux réponses les plus simplistes », a déclaré le chef de l'Etat français lors de son arrivée, mercredi 17 avril, dans la capitale belge avant la tenue d'un sommet européen, au cours d'un bref échange avec la presse aux côtés de la tête de liste de son camp aux européennes, Valérie Heyer. « Il y a aujourd'hui une espèce d'hypocrisie du débat et j'espère qu'en rentrant dans les prochaines semaines dans celui-ci, cette hypocrisie sera levée », a ajouté M. Macron, visant en creux le RN.

Il s'agissait de la première apparition publique du chef de l'Etat et de M^{me} Hayer depuis le début de la campagne, avant qu'ils n'assistent ensemble à une réunion du groupe Renew Europe.

Lire aussi | [Elections européennes 2024 : le calendrier du scrutin](#)

La candidate du camp présidentiel peine pour l'instant à imprimer sa marque dans la campagne. « On s'organise, on a la bonne candidate (...) On a surtout les bonnes idées, celles qui se sont mises en place en Europe ces dernières années », a lancé M. Macron, interpellé par un journaliste.

— 19 —
akármint lesz, el kell neki lopni a kissasszonyt, jobb hárha most elszokkent, azután majd tanácsot kérhet a rókától.

El is születte a szerencsésen, kimentek a mezőtől a királyi nászból, ott, — mig az inas a lovakat nyergítette, — a királyi félre ment, elszakította az ördülök szál szöröt is. Ott termett a róka:

— Mi a baj felélegű király?

— Hat bízom most az, hogy nem tudom a királykissasszonyt valójában meg, vagy másik néfűtő menek haza? — merít igy, meg így áll a dolog.

Sohse' búsaljon azon a királyi, majd elintélezem én azt, most majd együtt megyek fel ségeddel.

Munket szánom együtt négyen: a királyi, a szép királykissasszony, az inas meg a róka. Mivel ahol a vásoroshoz értek, ahova a kissasszonyt kellett venni vinni, a vásor végén a róka épen olyan szép kissasszonynál változott mint az igazi, úgy hogy a királyi is elgutatta megismerőitől, aki a róka-kissasszonyt megtanulta igazánuk, hogy csak menjenek az inasnal, nekik most a királyi val egy kis dolgot van, hanem majd utánuk mennek. Ment azután a kissasszonytovább, a kinekli.

^{2*}

— 16 —

ellopod, neked adom az aranyoszú lovát, a gyémánt szerszámot, meg még ráadásul tiz

köböl arany abrákat.

Jól van; megigérte a királyi hogy ellopja, avval kiment a vásor végére az inasához. Itt megint mit volt mi tenni? El kellett szakítani a negyedik szál szort is. Ott termett a róka:

— No mi a baj felséges királyi.

— Hát csak e' meg e. Itt elbeszélte a királyi hogy már meg királykissasszonyt kellenek lojni.

— No királyi — mondja a róka, — most öltözök fel szakács ruhába, menjön el ahol a királyhoz, szegődjék be szakácsnak. Délben majd felséged vigye be a levest, hanem az aj-

toban ejts el. Tábbbet azután nem mondok.

Eltünt a róka megint, a királyi pedig az inasával ment a harmadik király országába felé. Mikor azóta a vásoroshoz értek, ahol a királyi kattott, felöttöltött a királyi szakácsruhába, az inas a róla végén hagyta, hogy báment a királyi palotába. Épen kint sétálgatott a királyi az udvaron; oda ment hozzá a királyi:

— Felséges király én szakács vagyok, azért jöttem hogy beszegődjem felségedhez, hahogy megfogadna.

^{3*}

— 18 —
király fia, meg mászt is minden, az egész élete folyását, mindenjárt bleszerzett együttműködésben. A kissasszonyt is elbeszélte, hogy az övezet most egy igencső gondozás királyi kérte meg, de neki nincs kedve hozzá menni, mert más olyan öreg, hogy a hanusz is manu-haszul, erőlteti hogy menjön hozzá; „Most nem szírem szereleme, hogy az apájamak mind nem mászt mit tenni, hanem az ejjjel szökjünk meg, majd a te áprád országában megcsökűlik hetünk.

Kapott a királyi két készzel a tanácsra,

mindjárt elhatározták, hogy még azon az ejjjel szakán, majd ha mindenki leányugrászik a királyi udvarban, megszöknek, reggelre pedig ha

lehet, — túl tézik magukat a hármonon. Ervél,

a királyi kiment a kissasszony szobájából, várta az ejjjelt; csak akkor jutott esécbé, hogy ne-

ki ezt a kissasszonyt a szomszéd királyának kel-

nini, hogy a lovát megkaphja, mert ha azt meg nem kapja, az aranyoltú madár se lesz az óvéc a nélküli pedig nem akart az apja szeme előbe.

Miután ezen szörnyű módon, már azt is

gondolta, hogy érte se meg a kissasszonytér,

talking to a chatbot about a
lot of documents is called

retrieval augmented
generation

tech people call it R.A.G.

But I'm a little worried the answer
is going to be wrong!!!!

Did the AI actually find **relevant documents**?

Did we send **too few** sections, so it doesn't have the answer?

Did we send **too many** sections, confusing the AI?

Did it **hallucinate** even if it had the right content?

Chatbots May ‘Hallucinate’ More Often Than Many Realize

When summarizing facts, ChatGPT technology makes things up about 3 percent of the time, according to research from a new start-up. A Google system's rate was 27 percent.

ChatbotBeta

FEEDBACK

MyCity Chatbot Beta

We are continuously working to improve the MyCity Chatbot, which uses business-related NYC agency data and AI to answer your questions. Your feedback is invaluable for refinement.

Example Questions

"How do I avoid noise violations and complaints for my construction company?"

"What information can you help me with?"

"How do I apply for the MWBE program?"

Capabilities

Trained to provide you with official NYC Business information.

Will not use the contents of your chat history to learn new information.

Responds to languages required by Local Law 30.

Limitations

May occasionally produce incorrect, harmful or biased content.

Limited knowledge of the world beyond NYC Business topics.

Trained to decline inappropriate requests.

© 2024 City of New York. All Rights Reserved.

Terms of Use Privacy Policy

Ask MyCity Chatbot business-related questions only

NYC's AI Chatbot Tells Business the Law

The Microsoft-powered bot says bosses can take
can discriminate based on source of income

By [Colin Lecher](#)

March 29, 2024 06:00 ET

? Question Submitted

Are buildings required to accept section 8 vouchers?

NYC Chatbot Answer (Emphasis by The Markup)

"No, buildings are not required to accept Section 8 vouchers."

Reality

Landlords [cannot discriminate by source of income](#), with a minor exception for small buildings where the landlord or their family lives.

Do landlords have to accept tenants on rental assistance?

"No, landlords are not required to accept tenants on rental assistance."

Landlords [cannot discriminate by source of income](#), with a minor exception for small buildings where the landlord or their family lives.

Can I keep my funeral home pricing confidential?

"Yes, you can keep your funeral home pricing confidential. There are no specific regulations that mandate the disclosure of funeral home pricing in New York City."

[The Federal Trade Commission](#) has outlawed concealing funeral prices.

Can I make my store cashless?

"Yes, you can make your store cashless in New York City. There are no specific requirements that prohibit businesses from operating as cashless establishments in the city."

Stores have been [required to accept cash](#) as payment since 2020.

RAG is very irresponsible
(especially facing readers!)
but it's *also* very easy and fun

so let's do it!

Llamaindex - Llamaindex

docs.llamaindex.ai/en/stable/#getting-started

Llamaindex

Getting Started

Llamaindex is available in Python (these docs) and [TypeScript](#). If you're not sure where to start, we recommend reading [how to read these docs](#) which will point you to the right place based on your experience level.

30 second quickstart

Set an environment variable called `OPENAI_API_KEY` with an [OpenAI API key](#). Install the Python library:

```
pip install llama-index
```

Put some documents in a folder called `data`, then ask questions about them with our famous 5-line starter:

```
from llama_index.core import VectorStoreIndex, SimpleDirectoryReader
documents = SimpleDirectoryReader("data").load_data()
index = VectorStoreIndex.from_documents(documents)
query_engine = index.as_query_engine()
response = query_engine.query("Some question about the data should go here")
print(response)
```

If any part of this trips you up, don't worry! Check out our more comprehensive starter tutorials using [remote APIs like OpenAI](#) or [any model that runs on your laptop](#).

Can I deny renters based on Section 8 vouchers

No, you cannot deny renters based on Section 8 vouchers. It is against the law to discriminate based on a current or prospective tenant's source of income, including housing vouchers.

Show Citations >

but can i consider credit scores?

If the voucher/subsidy covers 100% of the rent, you are prohibited from considering credit. However, if the tenant pays a portion of the rent, you may consider credit. Each application should be considered on a case-by-case basis.

The screenshot shows a PDF document titled "FairHouse_FAQBroker-2021Eng.pdf". The document is dated March 2023 and is from NYC.gov/HumanRights (@NYCCHR). It contains a section titled "BEST PRACTICES FOR LICENSED SALESPERSONS AND BROKERS TO AVOID SOURCE OF INCOME DISCRIMINATION". The text discusses the responsibility of brokers for their agents' actions and advises against maintaining separate lists for voucher holders, as it constitutes aiding and abetting discrimination.

March 2023
NYC.gov/HumanRights
@NYCCHR

1

BEST PRACTICES FOR LICENSED SALESPERSONS AND BROKERS TO AVOID SOURCE OF INCOME DISCRIMINATION

Yes. You are responsible for the actions of anyone who works under your broker's license or holds themselves out as an agent of your brokerage company. What should I do if an owner refuses to accept housing vouchers/subsidies? You should not work with owners who discriminate based on a current or prospective tenant's source of income. Source of income discrimination must be treated just like any other kind of discrimination. It is against the law. Can I keep a separate list ("waitlist") of apartments for voucher holders? No. Maintaining separate lists of apartments for voucher/subsidy recipients is a discriminatory practice. Steering applicants to specific buildings not only constitutes discrimination, but may also be considered aiding and abetting the discrimination of owners.

This screenshot shows the EasyWhisper website. The main content is a transcription demo for 'Whisper JAX - a Hugging Face Space'. It features a dark-themed interface with a central input field for audio files. The demo explains that Whisper JAX is an optimized implementation of the Whisper model, running on JAX with a TPU v4-8 in the backend, making it 70x faster than PyTorch on an A100 GPU. It includes instructions for skipping the queue if needed. Below the demo, there's a section for creating an inference endpoint and a note about the Whisper JAX repository. At the bottom, there's a field for entering a YouTube URL and a 'My files' section.

MacWhisper

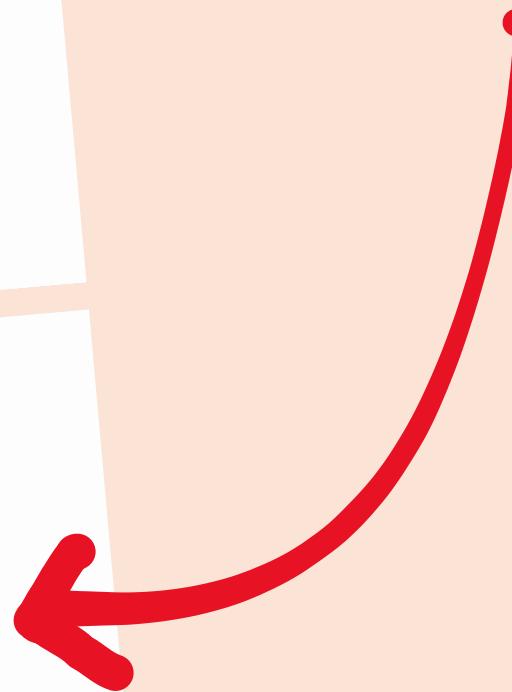

Jordi Bruin

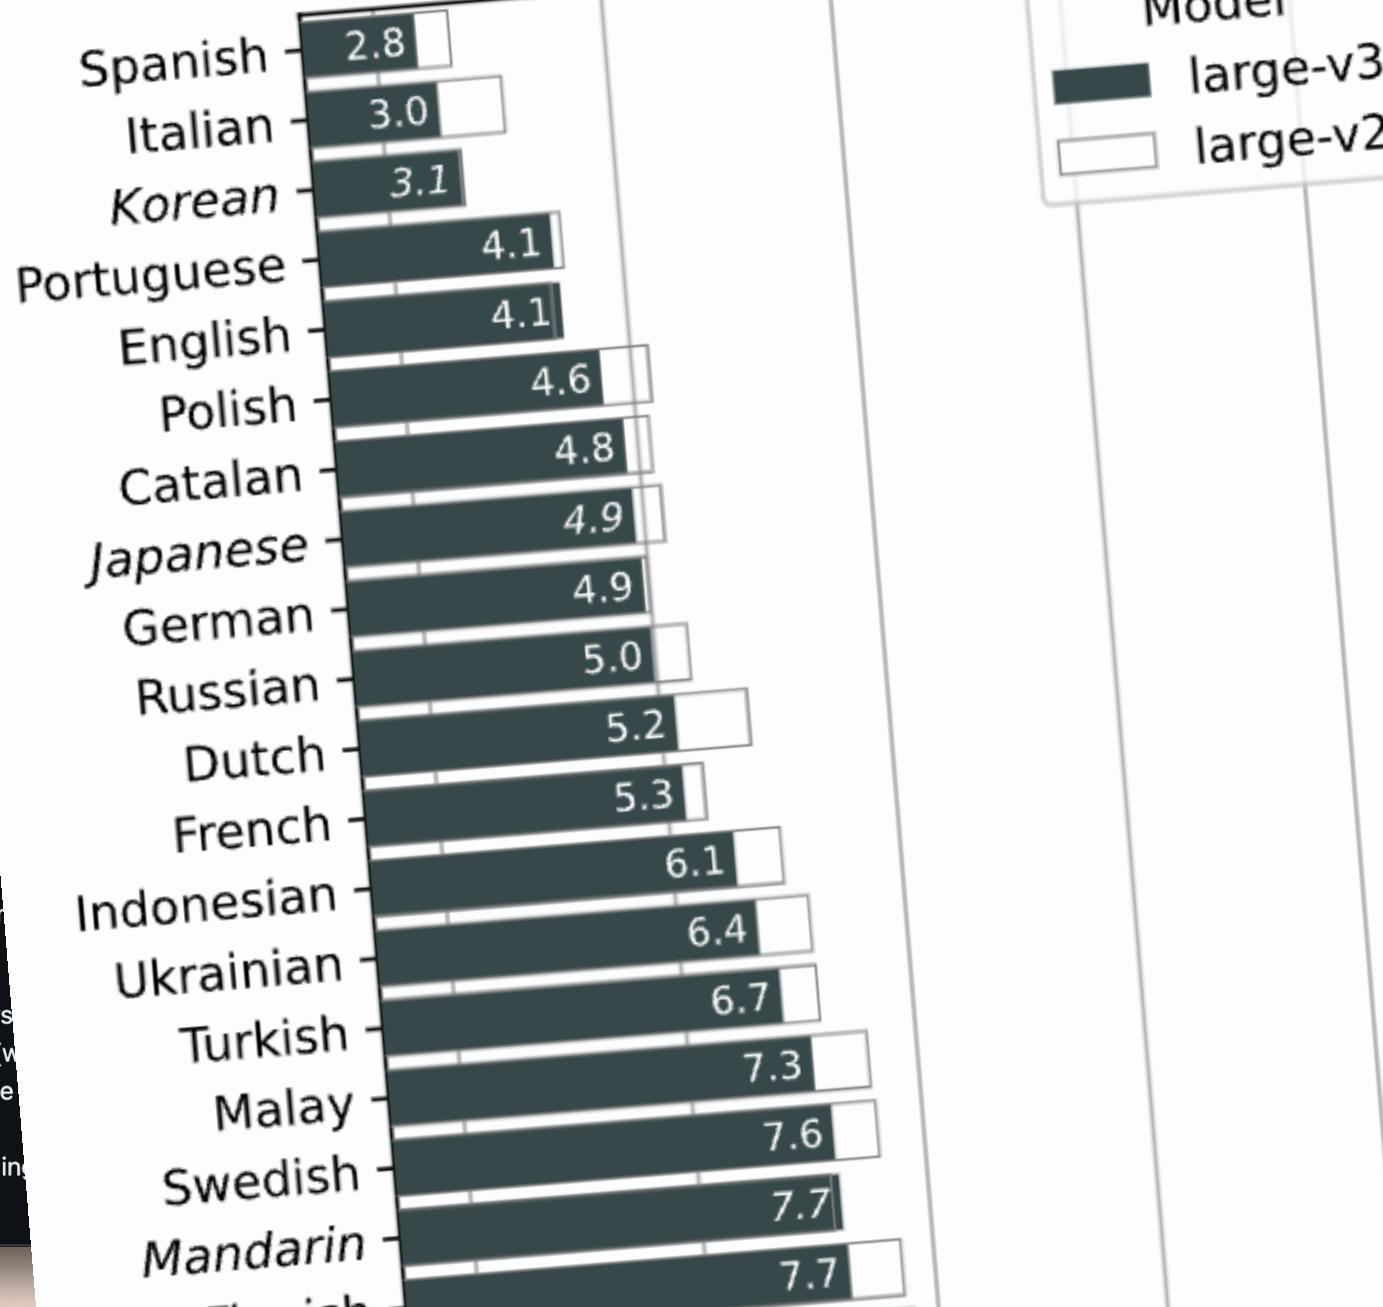

★★★★★ 1268 ratings

Quickly and easily transcribe audio files into text with OpenAI's state-of-the-art transcription technology Whisper. Whether you're recording a meeting, lecture, or other important audio, MacWhisper quickly and accurately transcribes your audio files into text.

Features

- Easily record and transcribe audio files on your Mac
- Just drag and drop audio files to get a high quality transcription
- Supported formats: mp3, wav, m4a, ogg, opus, mov and mp4 videos.
- Adjust whisper settings (beam search / greedy, beam size etc)
- Supports Tiny, Base and Small transcription qualities (and you can compare the transcription quality between all quality levels)

Available models and languages

There are five model sizes, four with English-only versions, offering speed and accuracy tradeoffs. Below are the names of the available models and their approximate memory requirements and inference speed relative to the large model; actual speed may vary on many factors including the available hardware.

Size	Parameters	English-only model	Multilingual model	Required VRAM	RAM
tiny	39 M	tiny.en	tiny	~1 GB	~100 MB
base	74 M	base.en	base	~1 GB	~100 MB
small	244 M	small.en	small	~2 GB	~100 MB
medium	769 M	medium.en	medium	~5 GB	~100 MB
large	1550 M	N/A	large	~10 GB	~100 MB

The .en models for English-only applications tend to perform better, especially for the tiny.en and base.en models. We observed that the difference becomes less significant for the small.en and medium.en models.

Whisper's performance varies widely depending on the language. The figure below shows the performance breakdown of large-v3 and large-v2 models by language, using WERs (word error rates) or CER (character error rates, shown in *italic*) evaluated on the Common Voice and Fleurs datasets. Additional WER/CER metrics corresponding to the other models and datasets can be found in Appendix D.1, D.2, and D.4 of [the paper](#), as well as the BLEU (Bilingual Evaluation Understudy) scores for translation in Appendix D.3.

Racial disparities in automated speech recognition

Allison Koenecke^a , Andrew Nam^b, Emily Lake^c, Joe Nudell^d, Minnie Quartey^e, Zion Mengesha^c, Connor Toups^c, John R. Rickford^c, Dan Jurafsky^{c,f}, and Sharad Goel^{d,1} 

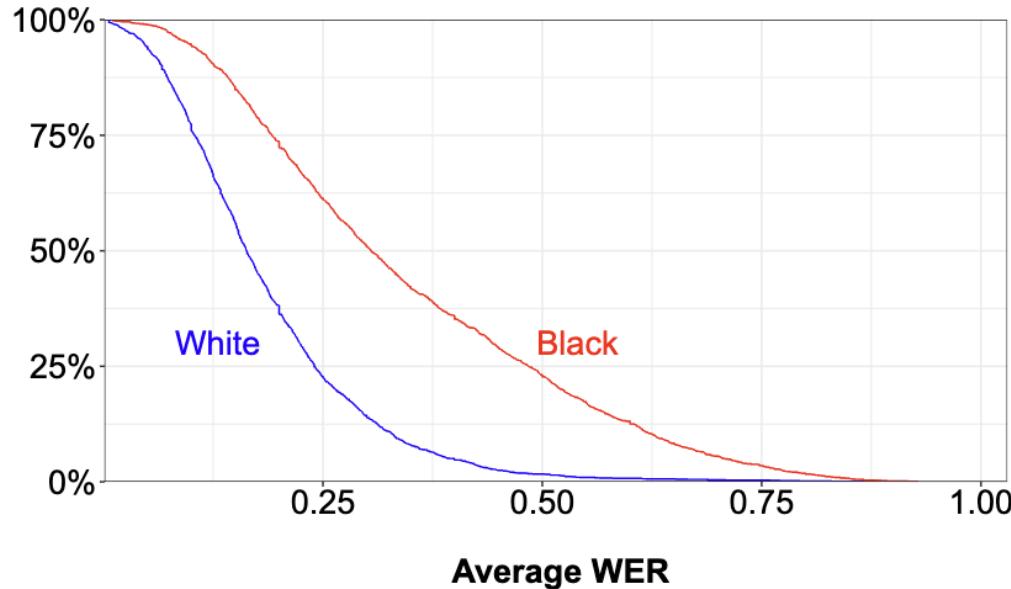

Fig. 2. The CCDF denotes the share of audio snippets having a WER greater than the value specified along the horizontal axis. The two CCDFs shown for audio snippets by white speakers (blue) versus those by black speakers (red) use the average WER across the five ASR services tested. If we assume that a $\text{WER} > 0.5$ implies a transcript is unusable, then 23% of audio snippets of black speakers result in unusable transcripts, whereas only 1.6% of audio snippets of white speakers result in unusable transcripts.

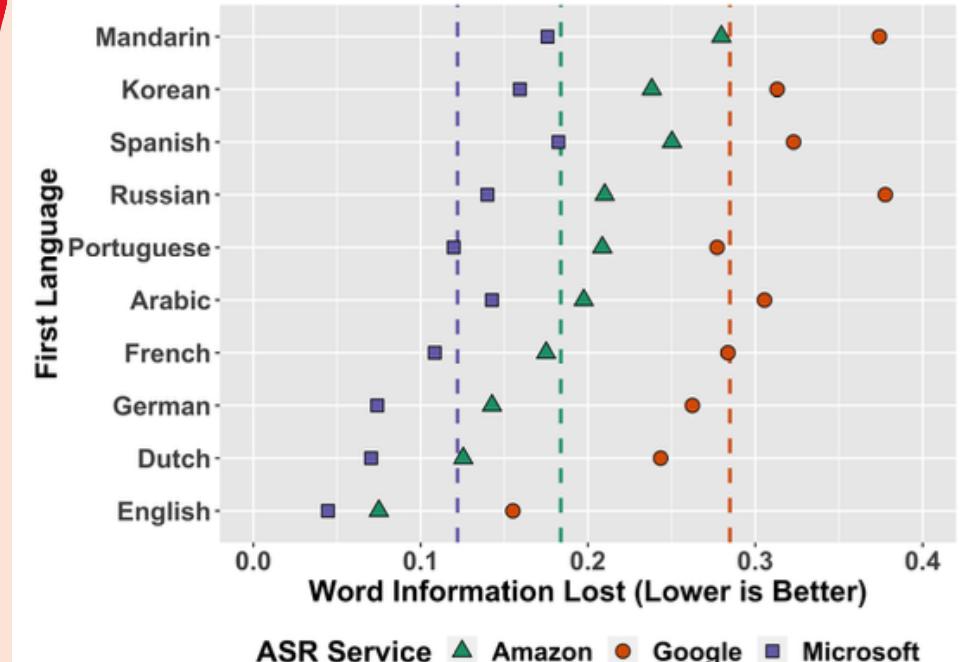

Performance Disparities Between Accents in Automatic Speech Recognition
